

## 10 Reasons to Consider Treating Your Teen with Invisalign:

1. Invisalign aligners are made of a virtually invisible plastic. In fact, your Teen will be surprised to see how many people won't even notice they are in treatment.
2. Invisalign Teen features compliance indicators, which fade over time with wear, to monitor patient compliance. In our practice, Teenage Invisalign Patients are our most compliant and motivated patients.
3. Invisalign offers up to 6 free replacement aligners free of charge. Invisalign replaces more lost trays for Adults than Teens.
4. Invisalign Teen can result in less appointments by virtually eliminating potential emergency visits common with traditional braces.
5. Invisalign Teen has been proven to be effective across a range of cases, from mild to severe. Please ask if you are a candidate for Invisalign Teen Treatment.
6. Invisalign Teen allows teens to eat all of their favorite foods whenever they want, because the aligners are completely removable.
7. Teens with Invisalign can easily maintain oral hygiene by brushing and flossing normally.
8. In our office, Invisalign Teen costs about the same as braces, with flexible payment plans available.
9. With Invisalign Teen, there's no worry about sharp brackets or wires cutting your Teens mouth.
10. Whether your Teen play sports or a musical instrument, a mouthful of metal can often prevent them from enjoying the things they want to. Invisalign Teen helps Teens focus on what they do best—being a teenager!
